Connect for FOOD

Connect for Food is a proven process to stimulate initiatives that advance our food sector and revitalize our rural economy.

CFF is a needs-based, results-driven approach committed to measurable outcomes. It is unique in that it is inclusive of all members of the *Food Wheel* and supply-demand spectrum, regardless of scale.

The process focuses on economic and social benefits of a diverse, integrated food system. It supports regional production, processing, and consumption, incorporating imports and exports in a dynamic balance. Emphasis is on *growing what we eat and eating what we grow*.

The success of CFF projects is founded on the engagement and support of individuals, organizations, communities, businesses and municipalities.

Connect for Food is offered exclusively through **Clearthink**
